EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Feng on 8/4/2006.

The application has been amended as follows:

On line 10 of claim 25, "and mixtures of Re and Pt;" has been deleted.

Claim 38 (found in the previous examiner's amendment) has been canceled.

Allowable Subject Matter

Claims 1-7, and 9-37 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or render obvious record does not disclose a process as called for in claim 1, for isomerization of a feed containing ethylbenzene in the presence of two different catalysts with a relative amount as called for the claim. Consideration of the IDS filed on 3/23/2006, the examiner found Abichandani (5,689,027) which discloses a process of using a system having two catalysts for isomerization of a feed containing ethylbenzene (the abstract). These catalysts are zeolites such as ZSM-5 (col. 4, lines 10-28). These catalyst may contain a long list of hydrogenation/dehydrogenation components including group VIII metals such as Pt, Pd, group VII metals such as Mn, Re, group VI metals such as Cr, Mo, group V metals such as Sb, Bi,

group IV metals, III metals and I metals. Noble metals are preferred (col. 8, line 56 thru col. 9, line 6). On column 6, lines 19-30, Abichandani discloses the relative volume of the first catalyst from 10 to 80 greater than the total catalyst volume. However, one having ordinary skill in the art who studies the patent to Abichandani and the examples shown in the specification must recognize that the inventor is the first who discovers that the relative volume of the two catalyst is a parameter which affect to the results of the process such as operation temperature, undesired cracked product such as C5-, paraxylene production, undesired C9+, and xylene loss. Therefore, the examiner decides to allow these claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuan D. Dang whose telephone number is 571-272-1445. The examiner can normally be reached on Mon-Thu.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on 571-272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
